CAREER SUMMARY

AI-powered Full-Stack Web Developer focused on building modern, responsive, and scalable web applications with React, Next.js, TypeScript, Go, REST APIs, and database-backed architectures. Skilled in turning UI/UX designs into reusable components, integrating APIs, managing authentication flows, and delivering production-ready web experiences across desktop and mobile. Comfortable using modern AI-assisted development workflows to speed up research, debugging, UI iteration, testing, and code quality while keeping the final implementation clean, maintainable, and user-focused.

WORK EXPERIENCE

Full-Stack Web Developer | React, Next.js & Go

Apr 2025 - Present

Building responsive, user-friendly, and full-stack web applications using modern JavaScript and TypeScript technologies.

Achievements:

- Developed responsive and scalable web applications using React.js, Next.js, TypeScript, Go REST APIs, and Tailwind CSS.
- Converted Figma and UI/UX designs into pixel-perfect, reusable, and maintainable frontend components.
- Built dynamic user interfaces with reusable components, custom hooks, and modern React patterns.
- Integrated REST APIs, handled client-side state, and connected frontend features with backend services.
- Worked with database-driven application patterns using MongoDB, PostgreSQL, and API-first development.
- Optimized website performance, accessibility, SEO, and responsiveness across desktop, tablet, and mobile devices.
- Collaborated with designers and backend developers to implement new features and improve existing products.
- Maintained clean, reusable, and well-documented code following industry best practices.

🔧 Technologies used:

React.js

Next.js

TypeScript

JavaScript

Tailwind CSS

Bootstrap

HTML5

CSS3

Go

JWT Auth

bcrypt

REST APIs

MongoDB

PostgreSQL

Supabase

Git & GitHub

Web UI & Frontend Developer (Practice / Portfolio Projects)

2024 - Present

Personal Projects

PROJECTS

WEB & AI PROJECTS

Logic Crack Hub (Full-Stack)
Next.js + Go platform with auth, credits, Stripe, and Supabase.

ChatSphere (Web App)
Responsive real-time chat web application.

Logic Crack Studio (Portfolio)
Responsive web portfolio and digital presence.

Mini Games (Web App)
Collection of fun and interactive browser mini-games.

Built frontend-focused web projects to strengthen practical experience with modern UI development, responsive layouts, and API-connected interfaces.

Achievements:

- Created responsive landing pages, portfolio screens, dashboard layouts, and reusable UI sections using React, Next.js, Tailwind CSS, and Bootstrap.
- Practiced converting design references into clean frontend components with attention to spacing, typography, mobile responsiveness, and browser consistency.
- Implemented forms, navigation, cards, grids, modals, and reusable component patterns for real-world web app interfaces.
- Used GitHub, npm, VS Code, Chrome DevTools, and deployment platforms to manage, debug, and publish web projects.

Netlify

Full-Stack Platform Developer (Project)

Logic Crack Hub

2025 - Present

Designed and documented a production-oriented premium assets platform with a Next.js frontend, Go REST API backend, Supabase database/storage, JWT authentication, Stripe payments, and Netlify deployment.

Achievements:

- Built the platform architecture around a Next.js frontend calling protected Go REST API endpoints through Netlify Functions.
- Implemented authentication requirements including registration, login, JWT bearer tokens, bcrypt password hashing, email verification OTPs, and password reset flows.
- Planned role-based access for guests, registered users, and admins, including protected user routes and admin-only asset/user management.
- Designed credit economy workflows for asset purchases, ownership checks, credit transactions, and Stripe Checkout webhook confirmation.
- Defined database responsibilities for users, assets, favorites, reviews, downloads, credit purchases, requests, messages, notifications, and OTP verification records.
- Integrated production services including Supabase PostgreSQL, Supabase Storage, Brevo transactional email, Stripe Checkout, GitHub, and Netlify environment variables.
